Join a free showing and an open Q&A session with the makers of “Cuatro Ciénegas” and “The Long Alchemy of Becoming”.

These two films bring science and art together to tell the story of the universe as played out in the enchanting valley of Cuatro Ciénegas, México.

Featuring spectacular cinematography and original music scores, the two films also reflect the outcomes of years of international scientific cooperation to unlock the secrets of the diversity of life found in this desert oasis and to protect it for future generations,
