

Summer Law Internship Flathead Lake Biological Station

Professional Experience & Summer Adventure

Spend the Summer at Flathead Lake!

This internship is designed to provide a UM law student with on-the-ground experience with environmental policy issues in the Flathead Basin, and the greater transboundary region. Work with FLBS personnel to tangibly link science with environmental policy and law while living and working on the shores of beautiful Flathead Lake

"Last summer I had the most incredible internship as the legal intern for the Flathead Lake Biological Station. I lived literally on the shore of Flathead Lake and researched legal remedies for water pollution coming from Canadian coal mines into Montana. It was an absolute dream." Anna Belinski, 2022 Law Intern
