

SUMMER SESSION 2020

at University of Montana's Flathead Lake Biological Station

Aquatic Microbial Ecology BIOE 400

July 6 - July 17, 2020

Take this 3-credit course for undergrad or grad credit!

Apply at <http://flbs.umt.edu/apps/education/>!

FLATHEAD LAKE
BIO STATION
UNIVERSITY OF MONTANA

Learn major concepts in microbial ecology and environmental microbiology.

Apply cutting-edge tools and methodologies to study aquatic microbes in diverse habitats.

Gain familiarity with the role of microorganisms in regulating aquatic biogeochemistry.

Develop widely applicable lab- and field-based science skills.

Instructor:

Dr. Matthew Church
Professor - Aquatic Microbial Ecology
matt.church@umontana.edu

2019 student Melissa DeSiervo says "I truly can't believe how much I learned in only two weeks, all while having fun and connecting with other scientists! One of the coolest things we discovered was the presence of purple sulfur bacteria thriving in anoxic conditions on the bottom of one of the lakes we sampled. What an experience!" Photos courtesy of Melissa DeSiervo.

- * Scholarships available!
- * Small class size
- * Great instructor and facilities
- * Students from U of Montana and universities across the US
- * International students welcome
- * Credits easily transferable
- * Questions? Call 406-872-4515
